About Us

In-Tech Automation Services provides specialized technical personnel to support industrial projects during installation, integration, commissioning, troubleshooting and launch phases. Our flexible service model allows clients to scale technical resources according to project workload, schedule and location requirements.

Key Benefits

- Faster ramp-up of skilled personnel.

- Reduced internal staffing pressure.

- On-site technical support by project phase.

- Experience with industrial automation environments.

- Coverage in Mexico and U.S.

Industries We Serve

Automotive

Driving performance and quality across modern vehicle production.

Logistics

Optimizing material movement and warehouse automation.

Food & Beverage

Ensuring safety, quality and efficiency in every step of production.

Manufacturing

Building smarter systems that improve output and reliability.

Why In-Tech

Specialized automation talent

Experts in controls, robotics and industrial systems.

Flexible staffing model

Scale up or down based on your project needs.

Fast deployment

Rapid mobilization to keep your operations moving.

Field-proven execution

Proven processes that deliver reliable results.

Safety and supervision support

On-site leadership that prioritizes safety and quality.
